

INNOVATION CONFERENCE 2025

BUILDING RESILIENCE FOR PORTS & THEIR VALUE CHAINS

9:30 - 15:00 | 21 OCTOBER | HOTEL VAN DER VALK
CONGRÈS LIÈGE

Today's world is characterized by an abrupt shift in security conditions. In addition to geopolitical and economic shocks, climate and natural phenomena as well as freak incidents at critical logistical junctions force us to rethink the safeguarding of data, critical infrastructure and supply chains.

Based on the examples of the major ports of our three country region – Belgium, Germany, and Luxembourg – and cases all along their value chains, the conference addresses critical issues and presents smart solutions and case studies for building resilience and protecting against external shocks and threats.

LIEGE

Strategically located in the DEBELUX-border region, Liège is a prime example of a significant regional hub for logistics by road, rail, air, and water.

The *Port of Liège* is Belgium's leading inland port and Europe's third largest. The location combines three main aims of this conference:

- Connecting value chains of seaports and inland ports
- Fostering co-operation in three-country border region despite competitive situation
- Finding innovative solutions for safeguarding strategic locations

What to expect:

- Pitching sessions for start-ups and scale-ups from all three countries
- Case studies on strengthening resilience along value chains
- High-ranking panel
- Networking opportunities
- Assessment by the diplomatic world

Participation fee:

50€ for members

(of AHK debelux or event marketing partners)

80€ for non-members

Be part of this event: we offer sponsoring and marketing partnerships
